**Deborah F. Cronin, VMD Mary Beth Hamorski, VMD
Christina Watson, DVM Adrienne Wood, DVM**

The following is our recommendation for initial vaccination series for horses with unknown vaccination history:

****Schedule on reverse side****

This protocol may also be used for naïve horses

E/W Encephalomyelitis* - Series of **2** vaccines 21-60 days apart, begin series in the **Spring if possible**

Tetanus Toxoid* - Series of **2** vaccines 21-60 days apart, usually given in conjunction with E/W Encephalomyelitis vaccine

Rabies* - One vaccine necessary yearly

West Nile Virus vaccine* - Series of **2** vaccines 21-42 days apart, begin series in the **Spring**

Botulism** - Series of **3** vaccines 30 days apart

Potomac Horse Fever (PHF)** - Series of **2** vaccines 21-60 days apart, begin series in the **Spring**

Rhino EHV 1/4 *** - Series of **2** vaccines 21-60 days apart

Flu IN (Intranasal)*** - 1 vaccination needed

Strangles*** - Series of **2** vaccines 21-60 days apart

**Strongly Recommended*

***Recommended*

****Recommended depending on stabling and exposure expectations*
